# Combining Tens and Units

Draw the correct number of beads and write down your answers. Follow the steps shown.

**Step 1:**  $40 + 5 = 45$

Diagram: An abacus with 4 tens beads and 5 units beads. A star with the number 3 is above the tens rod, and a star with the number 2 is above the units rod. An arrow points to the units rod with the text "Add one 5-bead".

**Step 2:**  $50 + 6 =$

Diagram: An empty abacus with 50 beads on the tens rod and 6 beads on the units rod.

**Step 3:**  $70 + 6 =$

Diagram: An empty abacus with 70 beads on the tens rod and 6 beads on the units rod.

**Step 4:**  $40 + 5 =$

# Number maze

The puffin is hungry. Help him find some food by moving to a square where the value is three more than the current square.

Start (63)

70 74 45 75 77 66 77 80 73 75 84 81 53 78 87 95 98

The maze consists of a grid of squares. A dashed line path starts at a puffin on a square labeled 'Start (63)'. The path moves to squares with the following numbers: 70, 74, 45, 75, 77, 66, 77, 80, 73, 75, 84, 81, 53, 78, 87, 95, and finally 98, where three fish are waiting. Other squares in the maze contain numbers that do not follow the path: 66, 69, 84, 87, 98, 70, 74, 45, 75, 77, 66, 77, 80, 73, 75, 84, 81, 53, 78, 87, 95, 98.

# What are the missing numbers?

Do you still remember how you might find the missing numbers? Use your soroban to find out the answers.

1.  $\boxed{23} + 66 = 89$   $\xrightarrow{\quad}$   $\boxed{23} = 89 - \boxed{66}$

2.  $\boxed{\quad} + 31 = 86$   $\quad = 86 - \boxed{\quad}$

3.  $\boxed{\quad} + 17 = 48$   $\quad = 48 - \boxed{\quad}$

4.  $65 = \boxed{\quad} + 25$   $\quad = 65 - \boxed{\quad}$

5.  $86 = \boxed{\quad} + 32$   $\quad = 86 - \boxed{\quad}$

6.  $68 = \boxed{\quad} + 26$   $\quad = 68 - \boxed{\quad}$

7.  $94 = \boxed{\quad} + 63$   $\quad = 94 - \boxed{\quad}$
